Purchase Inspection Equipment Like Your Business Depends On It! *And Depend On Service After The Sale.*

If you are buying a car you would probably kick a few tires, read a few reviews, ask around, and test drive before shelling out your cash. But you want more than just the car. You want reliability, warranty and service to go with it. Same goes for your business.

At PITCO we give you the whole package: built in reliability, new equipment warranty, and an experienced team of engineers and technicians to back you up for the life of the equipment. After all, it is our equipment with the PITCO and Scan Systems name displayed for all to see. We want it to work for you and for you to brag on us.

We also recognize that new and used equipment gets passed around the industry from one agent to another. The seller often doesn't offer or have the technical support to keep the equipment working to make money for you. What's going to happen if this equipment goes down? We know you are not going to brag on it, but, like the line from the movie *Ghostbusters*: "Who you going to call?" The answer: PITCO!

So call us if you want a higher level of security in supporting your business. We offer the whole package you should expect for your money.
